PLEASE CAREFULLY READ THE SEPARATE HEALTH AND SAFETY PRECAUTIONS BOOKLET INCLUDED WITH THIS PRODUCT BEFORE USING YOUR NINTENDO® HARDWARE SYSTEM, GAME DISC OR ACCESSORY. THIS BOOKLET CONTAINS IMPORTANT HEALTH AND SAFETY INFORMATION.

IMPORTANT SAFETY INFORMATION: READ THE FOLLOWING WARNINGS BEFORE YOU OR YOUR CHILD PLAY VIDEO GAMES

**WARNING - Seizures**

- Some people (about 1 in 4000) may have seizures or blackouts triggered by light flashes or patterns, such as while watching TV or playing video games, even if they have never had a seizure before.
- Anyone who has had a seizure, loss of awareness, or other symptom linked to an epileptic condition should consult a doctor before playing a video game.
- Parents should watch when their children play video games. Stop playing and consult a doctor if you or your child have any of the following symptoms:

<table>
<thead>
<tr>
<th>Convulsions</th>
<th>Eye or muscle twitching</th>
<th>Loss of awareness</th>
</tr>
</thead>
<tbody>
<tr>
<td>Altered vision</td>
<td>Involuntary movements</td>
<td>Disorientation</td>
</tr>
</tbody>
</table>

To reduce the likelihood of a seizure when playing video games:

1. Sit or stand as far from the screen as possible.
2. Play video games on the smallest available television screen.
3. Do not play if you are tired or need sleep.
4. Play in a well-lit room.
5. Take a 10 to 15 minute break every hour.

**WARNING - Repetitive Motion Injuries and Eyestrain**

Playing video games can make your muscles, joints, skin or eyes hurt after a few hours. Follow these instructions to avoid problems such as tendinitis, carpal tunnel syndrome, skin irritation or eyestrain:

- Avoid excessive play. It is recommended that parents monitor their children for appropriate play.
- Take a 10 to 15 minute break every hour, even if you don’t think you need it.
- If your hands, wrists, arms or eyes become tired or sore while playing, stop and rest them for several hours before playing again.
- If you continue to have sore hands, wrists, arms or eyes during or after play, stop playing and see a doctor.

**WARNING - Electric Shock**

To avoid electric shock when you use this system:

- Do not use the Nintendo GameCube during a lightning storm. There may be a risk of electric shock from lightning.
- Use only the AC adapter that comes with your system.
- Do not use the AC adapter if it has damaged, split or broken cords or wires.
- Make sure that the AC adapter cord is fully inserted into the wall outlet or extension cord.
- Always carefully disconnect all plugs by pulling on the plug and not on the cord. Make sure the Nintendo GameCube power switch is turned OFF before removing the AC adapter cord from an outlet.

**CAUTION - Motion Sickness**

Playing video games can cause motion sickness. If you or your child feel dizzy or nauseous when playing video games with this system, stop playing and rest. Do not drive or engage in other demanding activity until you feel better.

**CAUTION - Laser Device**

The Nintendo GameCube is a Class I laser product. Do not attempt to disassemble the Nintendo GameCube. Refer servicing to qualified personnel only.

Caution - Use of controls or adjustments or procedures other than those specified herein may result in hazardous radiation exposure.

**CONTROLLER NEUTRAL POSITION RESET**

If the L or R Buttons are pressed or the Control Stick or C Stick are moved out of neutral position when the power is turned ON, those positions will be set as the neutral position, causing incorrect game control during game play.

To reset the controller, release all buttons and sticks to allow them to return to the correct neutral position, then hold down the X, Y and START/PAUSE Buttons simultaneously for 3 seconds.

Long ago in the land of Hyrule, legends spoke of the Triforce—three golden triangles with mystical powers. When Ganon, Prince of Darkness, invaded the kingdom and stole the Triforce of Power, the princess Zelda took the Triforce of Wisdom and broke it into eight pieces. She hid them to protect the Triforce from Ganon's clutches. Furious, Ganon imprisoned Zelda. It was a young boy named Link who endeavored to save her...

Originally released: July, 1987
After Ganon was destroyed, Impa, Princess Zelda's nursemaid, told Link that a sleeping spell had been cast on Princess Zelda and that only the power of the Triforce could awaken her. Armed with six crystals and an ancient scroll, Link embarked on his most challenging quest yet, unaware that evil forces were hunting him in the hopes of sacrificing Link and using his blood to revive the evil Ganon.

Experience and Magic

Experience/Leveling Up

After defeating an enemy, a number will appear where the enemy once stood. This number represents the experience points Link will receive for defeating the enemy. The stronger the enemy, the larger the number and the more experience points Link will receive. When Link has collected enough points, a menu will appear which allows you to increase one of Link’s following three attributes:

- **Attack**
  Link can inflict more damage to enemies.

- **Magic**
  Link’s MAGIC points will not decrease as fast.

- **Life**
  Link’s LIFE Energy will not decrease as fast.

To increase an attribute, move the cursor next to the attribute that you wish to increase and press START/PAUSE. If you wish to wait and save your points, move the cursor next to CANCEL and press START/PAUSE. Each attribute can be raised eight levels.

Magic

There are eight Magic Spells which Link can learn. Each spell consumes a different amount of Link’s magic points, so use them wisely.

- **Shield**
  Reduces enemy damage by half.

- **Fire**
  Allows Link to throw a fireball.

- **Jump**
  Increases the height Link can jump.

- **Reflect**
  This magic will bounce back spells cast by magicians.

- **Life**
  This will recover a portion of Link’s Life Energy.

- **Spell**
  A mysterious spell. You must find its uses to complete your journey.

- **Fairy**
  Allows Link to fly and enter small areas by turning him into a fairy.

- **Thunder**
  The most powerful of all the magic, Thunder will defeat all the enemies on the screen.

To use a magic spell, press the Y Button when you are in town or a fight screen. To select a spell, press START/PAUSE and move the cursor next to the spell, then press the Y Button. The number next to the spell shows how many magic points are required to use the spell.
A long, long time ago, the land of Hyrule, blessed by the three golden goddesses, was a land at peace. But one day a wicked man from the desert appeared and began searching for the doorway to the Sacred Realm where the Golden Power, the Triforce, lay hidden. Chosen for his courage, Link was tasked with preventing this evil man from ever entering the sacred realm of legend and obtaining the divine relic.

Fairies and L-Targeting

Link's guardian fairy helps and supports Link during his adventure. She gives helpful hints such as enemy weaknesses. If she calls you during the game, press Up on the C Stick to see what she has to say.

**Fairy**

When Link gets close to an enemy or object that the fairy can help with, she flies in that direction. That enemy or object has a triangle mark next to it. If you press the L Button, Link looks in the fairy's direction, and the enemy or object is surrounded by the Focus Cursor. This is called L-Targeting. When you use L-Targeting, an icon appears in the top-right corner of the screen. Press Up on the C Stick to read the fairy's advice.

When using L-Targeting on people or signs, the fairy icon does not flash. Instead, the SPEAK or CHECK commands appear.

**Using L-Targeting**

L-Targeting will not only help you with advice, but it can also help you target things, aim weapons, and interact with characters.

Having waged his battles across time to defeat the evil Ganon and restore peace to Hyrule, Link departed from the land that made him a legend. On a personal journey in search of a beloved and invaluable friend, Link was waylaid while traveling through the Lost Woods, and his horse and precious Ocarina were stolen from him. His pursuit of the villain led him into the strange, parallel world of Termina, where he found his fate tied to its impending doom...

ATTENTION: You may notice slight sound irregularity when playing The Legend of Zelda: Majora’s Mask. This is a result of transferring the game from its original N64 version to Nintendo GameCube and does not indicate any problem with your system. This irregularity does not occur when playing other Nintendo GameCube software.

The Many Masks of Link

A variety of masks can be found throughout the game. Several of these masks actually have the power to change Link's shape when he wears them. As Link's shape changes, he will be given new, unique abilities.

**Special Abilities**

When you play the Song of Time, your game progress will be saved as you travel back in time. However, while items you have gotten are saved, puzzles within mazes and other events you have cleared will revert to their original status, so be careful when saving. Since Link is the only one who travels through time, the other characters in the game will not remember meeting him. When you want to save your game and quit playing, play the Song of Time and wait until “Dawn of the First Day” appears on screen before turning the power OFF. The next time you play, you can continue your game from that point. If you turn the power OFF without saving, you will continue from Dawn of the First Day from the last time you saved.

**When Life Energy Reaches Zero**

- You will always be returned to 6:00 a.m. of the first day.
- Your game progress (data) will be saved.

**NOTE:** There are some things in the game that can be saved and some that cannot, so timing your saves is very important.

---

The contents of your Bombar’s Notebook are saved when you use the Song of Time, but your conversations with these people are not, so you may have to repeat some tasks and conversations.
