PLEASE CAREFULLY READ THE SEPARATE HEALTH AND SAFETY PRECAUTIONS BOOKLET INCLUDED WITH THIS PRODUCT BEFORE USING YOUR NINTENDO® HARDWARE SYSTEM, GAME PAK OR ACCESSORY. THIS BOOKLET CONTAINS IMPORTANT HEALTH AND SAFETY INFORMATION.

IMPORTANT SAFETY INFORMATION: READ THE FOLLOWING WARNINGS BEFORE YOU OR YOUR CHILD PLAY VIDEO GAMES

**WARNING - Seizures**

- Some people (about 1 in 4000) may have seizures or blackouts triggered by light flashes or patterns, such as while watching TV or playing video games, even if they have never had a seizure before.
- Anyone who has had a seizure, loss of awareness, or other symptom linked to an epileptic condition should consult a doctor before playing a video game.
- Parents should watch when their children play video games. Stop playing and consult a doctor if you or your child have any of the following symptoms:
  - Convulsions
  - Eye or muscle twitching
  - Loss of awareness
  - Altered vision
  - Involuntary movements
  - Disorientation

To reduce the likelihood of a seizure when playing video games:

1. Sit or stand as far from the screen as possible.
2. Play video games on the smallest available television screen.
3. Do not play if you are tired or need sleep.
4. Play in a well-lit room.
5. Take a 10 to 15 minute break every hour.

**WARNING - Repetitive Motion Injuries and Eyestrain**

Playing video games can make your muscles, joints, skin or eyes hurt after a few hours. Follow these instructions to avoid problems such as tendinitis, carpal tunnel syndrome, skin irritation or eyestrain:

- Avoid excessive play. It is recommended that parents monitor their children for appropriate play.
- Take a 10 to 15 minute break every hour, even if you don’t think you need it.
- If your hands, wrists or arms or eyes become tired or sore while playing, stop and rest them for several hours before playing again.
- If you continue to have sore hands, wrists or arms or eyes during or after play, stop playing and see a doctor.

**WARNING - Battery Leakage**

Leakage of battery acid can cause personal injury as well as damage to your Game Boy. If battery leakage occurs, thoroughly wash the affected skin and clothes. Keep battery acid away from your eyes and mouth. Leaking batteries may make popping sounds.

To avoid battery leakage:

- Do not mix used and new batteries (replace all batteries at the same time).
- Do not mix alkaline and carbon zinc batteries.
- Do not mix different brands of batteries.
- Do not use nickel cadmium batteries.
- Do not leave unused batteries in the Game Boy. When the batteries are losing their charge, the power light may become dim, the game sounds may become weak, or the display screen may be blank. When this happens, promptly replace all used batteries with new batteries.
- Do not leave batteries in the Game Boy or accessory for long periods of non-use.
- Do not leave the power switch on after the batteries have lost their charge. When you finish using the Game Boy, always slide the power switch OFF.
- Do not recharge the batteries.
- Do not put the batteries in backwards. Make sure that the positive (+) and negative (-) ends are facing in the correct directions. Insert the negative end first. When removing batteries, remove the positive end first.
- Do not dispose of batteries in a fire.
The official seal is your assurance that this product is licensed or manufactured by Nintendo. Always look for this seal when buying video game systems, accessories, games and related products.

The Legend of the Picori

Long, long ago, evil spirits descended on the land of Hyrule. Just when it seemed that the world was to be cast into the darkest of shadows, the tiny Picori appeared from the skies and bestowed on a courageous human a shining golden light and a single sword. This bravest of men used his wisdom and courage, his golden light, and his sword to fight off the demons and restore peace to the world. The people were so grateful for the Picori's help that they held an annual celebration in their honor. The tradition of the Picori Festival continued, but over the generations, the Picori themselves passed into legend.

The legend of the Picori tells of a mystic doorway that opens just once every hundred years. When the door is open, the Picori can cross from their world into Hyrule. This year is that year in one hundred, and the festival is unusually grand. Hyrule Castle is hosting a tournament of sword-fighting skill, recalling the great battles of legend. This year's champion is a man by the name of Vaati. He has won the tournament with an almost magical ease, and all of Hyrule is abuzz with rumors about this shadowy figure. “Who is this Vaati?” they ask. “What has brought him to Hyrule?”
The hero of the story! Hearing that he’s heading to the Picori Festival with Princess Zelda, his grandfather sends him on an errand: to deliver to Hyrule Castle the sword that will be presented to the champion of the tournament.

**LINK**
The princess of Hyrule and a longtime friend of Link. She stops in at Link’s house, asking if he can join her at the annual Picori Festival.

**PRINCESS ZELDA**
A mysterious creature that Link meets during his adventure. He chatters away noisily at Link. He can be quite fussy, but he does seem to know what he’s talking about.

**VAATI**
The champion of this year’s sword-fighting tournament. Nobody knows where he came from, and nobody knows who he is.

The game is over when your Heart Meter runs out. Once your game ends, you will be asked if you want to save your progress. Then, you can continue or quit.

The hearts represent your life energy in the game. The hearts decrease whenever you take damage, and the game ends when you lose all of your hearts.

Pick up a heart to refill one heart on your Heart Meter.

Catch a small fairy to restore four hearts’ worth of life.

Any items you had in your possession when your game ended will be saved.

When you resume a saved game, you might not start from the exact place where you saved. However, your progress will have been saved, and your Heart Meter will show the same number of Heart Containers as you had when you saved.

If you get stuck during the adventure, try seeing what happens when you put certain things in a bottle and carry them around with you...

You can save your game at any time by choosing “Save” from the Items or Quest Status subscreens.

Somewhere in the world is a shop selling potions capable of restoring hearts. You can’t buy potion unless you have an empty bottle to put it in.

Your Heart Container increases when you get a Heart Container. Collect four Pieces of Heart to make a full Heart Container. See how many Pieces of Heart you have collected on the Quest Status subscreen.

You'll need small keys to open locked doors in the dungeons. They disappear as you use them.

The dungeons become more difficult as the adventure goes on. Consult your Dungeon Map when you get stuck. It's only common sense!

The door that leads to the dungeon boss's room can only be opened with the Big Key.

When you find this item, you will be able to see all the rooms on every floor of the dungeon. Rooms you've visited will be lighter than rooms you haven't visited yet.

When you find the Compass, you will be able to see the location of treasure chests and the dungeon boss on the Floor Map.
